

Garden Sensations®

Forest Faces

Materials needed:

- hammer or screwdriver
- 3-4 small nails or screws

Less than 5 minutes to hang!

Add personality to your trees!

Forest Faces are easy to hang. If you can hang a picture you can easily hang your Forest Face.

To hang your Forest Face you can either use a hammer and small nails or a screwdriver and small screws. In the area on the tree that you want to hang the face tap a small nail into the tree for one of the eyes, leave about 1/4 inch of the nail sticking out. Then hang the eye using the small wire loop on the back of the eye. You can now locate where you want to place the other eye and do the same thing tapping a small nail into the tree or you can use a screwdriver and drive small wood screws into the bark to hang the pieces on. Be creative in deciding where to hang the nose and mouth. You can create many different looks depending on how you space and hang the various pieces. **CAUTION: DO NOT USE COPPER NAILS AND SCREWS.**
